EDUCATION

B.Tech, Computer Science & Engineering

AKS University, Satna, M.P. *Sep. 2022 – May 2026*

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, SQL**.**
Frontend Development: React.js, Redux Toolkit, Tailwind CSS, HTML5, CSS3, Axios.
Backend & Security: Node.js, Express.js, RESTful APIs, JWT session, RBAC, Nodemailer.
Databases: MySQL, Sequelize ORM, MongoDB Atlas.
Tools: Git, GitHub, VS Code, PostMan, MongoDB Compass, Multer, Netlify, Render, Vercel.
Core CS Concepts: Data Structures, OOPs, DBMS, Operating Systems**.**

EXPERIENCE

Software Developer Intern – Classbit Education & Technology Pvt. Ltd. | On-site *Jan. 2026 – Jun. 2026*

- Co-developed a modular enterprise HRMS in a 2-developer team, structuring scalable Express REST APIs for automated payroll, compliance, and employee operations.
- Architected a normalized MySQL relational schema with 3-tier role-based access control (Admin, HR, Employee) using JWT for granular route security.
- Integrated an internal team communication module supporting Cloudinary media streaming, asynchronous file handling, and real-time state synchronization.

PROJECTS

Geo-Verified Attendance & Field Audit System | Live Demo: https://attendance-system-omega-gray.vercel.app
GitHub: https://github.com/Sahil485661/Attendance-System

Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, Sharp, ImageKit SDK, Tailwind CSS

- Engineered a mobile-first PWA to generate tamper-proof attendance and visual presence proofs for rural field workers under regulatory audit scrutiny.
- Optimized rural network data transfer by implementing client-side Canvas downscaling, cutting raw camera payloads by 95% (from ~8MB to <300KB) to ensure reliable sub-3s uploads on flaky 3G/4G connectivity.
- Built a server-side image pipeline using Node.js and Sharp to permanently composite authoritative IST timestamps, GPS coordinates, and offline Google Plus Codes directly onto captured photos.
- Streamlined image delivery via ImageKit CDN and integrated the native Web Share API for instantaneous one-tap WhatsApp verification sharing with audit supervisors.
- Deployed frontend on Vercel and backend on Render, orchestrating an automated external keep-alive cron job to eliminate free-tier cold starts.

Pumpkin Cosmetics — E-Commerce Platform | Live Demo: https://pumpkin-cosmetics-website.onrender.com
Github: https://github.com/Sahil485661/Pumpkin-Cosmetics-Website

Tech Stack: React.js, Node.js, Express.js, MongoDB Atlas, Tailwind CSS, Redux Toolkit, JWT, Nodemailer.

- Built a full-stack e-commerce store with centralized global state management using Redux Toolkit to maintain real-time cart persistence and checkout states across sessions.
- Developed REST APIs with server-side pagination, compound filtering, and search indexing in MongoDB to optimize product retrieval times under variable network conditions.
- Implemented secure JWT-based session handling with role-gated admin routes for inventory updates, catalog management, and automated Nodemailer transactional workflows.

CERTIFICATES

- **Postman Api Fundamental Student Expert** – Postman (2024) Credentials
- **Introduction To Generative AI** – AWS Educate (2025). Credentials
- **Get Started With Machine Learning in Azure** – MicroSoft Learn (2025) Credentials
